# Tips to Keep Your Smile

## About us

Since its establishment in 1966, Longguang has made great contributions to the healthy life of patients through the company's efforts for more than half a century. The external medicines it produces are sold in hospitals, drugstores, and bone-setting hospitals across Japan.

The products are promoted in Southeast Asia, China, Taiwan, China and other regions, and have been widely recognized and affirmed for their good therapeutic effects. For decades, Longguang has been adhering to the business principles of integrity first, advancing with the times, and innovative development, and has blazed its own path among many established external medicine manufacturers in Japan.

# History

- 1966
  - Nagoya City Higashi-ku "Homa Co., Ltd." was established
  - New Handa Factory in Kita-ku, Nagoya City
  - In December, the name was changed to "Micro Physical & Chemical Co., Ltd."
- 1969
  - Changed its name to "Longguang Industrial Co., Ltd."
- 1985
  - Medical supplies, drugs, cold patch development and sales
- 1986
  - Handa Factory was newly built and renamed "Longko Co., Ltd."
- 1987
  - Medical supplies, drugs, thermal patches developed and sold
- 1993
  - Hygiene management product "MRSA Clean" released
- 1996
  - Factory automation equipment completed
  - Regular hot and cold patches for medical use are on sale
- 1997
  - Build a new office building and merge it into a new office building
- 1998
  - Standard prescription preparation for medical use, MS temperature-sensing patch "Longguang Plaster Patch"
- 1999
  - Join the general medical drug market
- 2000
  - Indomethacin patch was developed and sold, entering the OTC market.
- 2004
  - "Longguang Co., Ltd." and "Longguang Pharmaceutical Co., Ltd." merged, The new company is "Longguang Co., Ltd."
- 2005
  - Handa second factory established
- 2006
  - 40th anniversary
- 2010
  - Development, development and sale of biphenylacetic acid patch
- 2015
  - Development, development and sale of diclofenac sodium preparations
- 2016
  - 50th anniversary of founding
  - Naphazoline rhinitis drug was developed and sold
  - Chairman Shintaro Takaoka takes office
  - General Manager Seiya Takaoka takes office
- 2017
  - "Aichi Prefecture Famous Brand" Enterprise Certification

## COOL REFENDA A Analgesic anti-inflammatory drug

### Class 3 drugs

#### Product features

Methyl salicylate, a cooling anti-inflammatory analgesic cream that relieves inflammation and pain, and contains tocopherol acetate (vitamin E) that promotes blood flow. Moreover, the air hole design means it will not be stuffy or cause rashes.

#### Effectiveness

Low back pain, bruises, sprains, frozen shoulder, joint pain, muscle pain, muscle fatigue, frostbite, fracture pain

#### Component (in 100g plaster)

Methyl salicylate...6.22g, dl-camphor...1.24g, peppermint oil...0.83g, l-menthol...3.11g, tocopheryl acetate (vitamin E)...0.35g

Additives include polybutene, raw rubber, polyisobutylene, ester gum, terpene resin, precipitated calcium carbonate, titanium oxide, natural latex, fragrance, methyl acrylate/2-ethylhexyl acrylate copolymer resin, polyoxyethylene nonyl Phenyl ether, red No. 405, yellow No. 205.

#### Usage/Dosage

Peel off the film on the surface of the patch and stick it on the affected area...  
1~2 pieces a day...

#### Packaging standards

30 pieces (6 pieces × 5 bags) / 1 box... 20 boxes / 1 box

Single product size: height 155×width 215×thickness 57mm, weight 570 g

Box size: Height 325×Width 445×Thickness 310mm Weight 12,000g

#### Effective date

36 months

## HOT REFENDA A Analgesic anti-inflammatory drug

### Class 3 drugs

#### Product features

It is a warm poultice that can be applied to areas of stiffness or pain. Vanillamide nonanoate and vitamin E (tocopherol acetate) have the dual effects of thermal stimulation and promote blood circulation in the affected area. The anti-inflammatory effects of ethylene glycol salicylate and l-menthol quickly relieve pain in the affected area. The slit design makes it fit perfectly with the elastic part. This product is mildly acidic to the skin and uses non-woven fabric with good stretchability, so it can be used even on joints.

#### Effectiveness

Low back pain, bruises, sprains, frozen shoulder, joint pain, muscle pain, muscle fatigue, frostbite, fracture pain

#### Component (in 100g plaster)

L-menthol...3.1482g, ethylene glycol salicylate...5.5968g,  
Tocopherol acetate...0.3498g, vanillyl nonanoate...0.0280g

Additives include polybutylene, raw rubber, polyisobutylene, ester gum, terpene resin, calcium titanium carbonate oxide, methyl acrylate/2-ethylhexyl acrylate copolymer resin, polyoxyethylene nonylphenyl ether, and rubber latex, Red No. 405.

#### Usage/Dosage

Peel off the film on the surface of the patch and stick it on the affected area...  
1~2 pieces a day...

#### Packaging standards

Single product size: 20×185×125mm Weight 63g (18 pieces×9)

Middle box size: 219×191×130mm Weight 730g 10 pieces

Large box size: 680×396×242mm Weight 8400g 100 pieces

#### Effective date

36 months

# Related Products

## COOL REFENDA A Analgesic anti-inflammatory drug

### Class 3 drugs

#### Product features

This product has strong adhesive strength, very good quality on the skin, high moisture content, and excellent compressive effect. This product is mild and weakly acidic, has good stretchability and is not printed, and can be used immediately.

#### Effectiveness

Low back pain, shoulder pain, joint pain, muscle pain, tenosynovitis (pain in hand and wrist), elbow pain (tennis elbow), contusion, sprain

#### Component

Methyl salicylate, menthol, dl-camphor, tocopheryl acetate, Additives, sodium acetate hydrate, kaolin, titanium oxide, CMC-Na, dihydroxyaluminum aminoacetate, D-sorbitol, glycerin, Tartaric acid, polysorbate 80, polyvinyl alcohol, partially neutralized polyacrylic acid, carboxyvinyl polymer, castor oil, fragrance.

#### Usage/Dosage

Peel off the film on the surface of the patch and stick it on the affected area...

1~2 tablets a day.....

Secure with bandages or tape if necessary.

#### Packaging standards

30 pieces (6 pieces × 5 bags) / 1 box... 20 boxes / 1 box

## INDOMETHACIN REFENDA ID 0.5% Analgesic anti-inflammatory drug

## INDOMETHACIN REFENDA IDH (Warmth sensation) Analgesic anti-inflammatory drug

### Class 2 drugs

#### Product features

It is made of shrinkable non-woven fabric and has a good fit. The indomethacin component it contains directly penetrates into the affected area and inhibits the pain-causing factors.

The production of prostaglandins, which is responsible for low back pain, joint pain, shoulder pain caused by sore shoulders, muscle pain, tenosynovitis, hitting, It has excellent therapeutic effects on sprained shoulders, etc.

#### Effectiveness

Low back pain, shoulder pain, joint pain, muscle pain, tenosynovitis (pain in hand and wrist), elbow pain (tennis elbow), contusion, sprain

#### Component

Indomethacin, additives: benzyl alcohol, polysorbate 80, partially neutralized polyacrylic acid, polyvinyl alcohol, CMC-Na, glycerin, D-Sorbitol, carboxyvinyl polymer, tartaric acid, sodium acetate hydrate, tocopheryl acetate, vitamin C, menthol, Kaolin, titanium oxide, dihydroxyaluminum aminoacetate, 1.3-butylene glycol, castor oil, fragrance

#### Usage/Dosage

Peel off the film on the surface of the patch and stick it on the affected area...

Do not use more than 2 tablets a day...

Not allowed for use by persons under 15 years of age.

#### Packaging standards

30 pieces (6 pieces × 5 bags) / 1 box... 20 boxes / 1 box

Single product size: height 155×width 215×thickness 58mm, weight 568 g

Box size: Height 325×Width 445×Thickness 310mm Weight 12,000g

#### Effective date

36 months

### Class 2 drugs

#### Product features

Made of shrinkable non-woven fabric, it has a good fit and the chili pepper extract can provide a good warmth effect.

The indomethacin component directly penetrates into the affected area and inhibits the production of prostaglandins that cause pain, thus treating low back pain, joint pain, It has excellent therapeutic effect on shoulder pain caused by shoulder soreness, muscle pain, tenosynovitis, hitting the ball, sprained shoulder, etc.

#### Effectiveness

Low back pain, shoulder pain, joint pain, muscle pain, tenosynovitis (pain in hand and wrist), elbow pain (tennis elbow), contusion, sprain

#### Component

Indomethacin, capsicum extract. Additives: sodium acetate hydrate, giant particles, caramel sodium (CMC-Na), titanium oxide, kaolin, Dihydroxyaluminum aminoacetate, fragrance, glycerin, D-sorbitol, polysorbitol 80, polyvinyl alcohol, polyacrylic acid part Neutralizers, tartaric acid, carboxyvinyl polymer, parabens, castor oil

#### Usage/Dosage

Peel off the film on the surface of the patch and stick it on the affected area...

Do not use more than 2 tablets a day...

Not allowed for use by persons under 15 years of age.

#### Packaging standards
